

ACCRETECH

SR. PROCESS ENGINEER

Accretech USA, an international supplier of semiconductor equipment, has an opening in its Austin, TX facility for a "hands-on" Senior Process Engineer. This position will join our development team to create both "process" and "hardware" solutions for our customers. Ph.D. in Physics, Chemistry, Engineering, Material Science or other related technical discipline preferred (MS degree with experience will be considered). The ideal candidate will have hands-on experience in CFD, heat transfer, flame-surface interactions and combustion modeling/verification. Required experience includes at least 6 years working in an industrial or academic environment (with at least 2 years as Principle Investigator) along with strong formal training in thermodynamics, fluid dynamics and combustion chemical kinetics. Occasional domestic and international travel is required.

Accretech offers an excellent compensation and benefits package. Qualified candidates only should submit their resume to recruit@accretechusa.com or by fax to (248) 332-4022. US Citizenship or permanent residency required. EOE. Principals only.
