

DA NanoMaterials L.L.C.

DA NanoMaterials L.L.C., headquartered in Tempe, Arizona, combines the expertise of DuPont in developing and manufacturing colloidal silica sols and particles for electronic applications with Air Products' manufacturing and technical leadership, on-site management capabilities, sales and marketing infrastructure and logistics expertise in providing the broad range of electronic gases and chemicals that surround a process tool.

We are currently seeking:

**REGIONAL
TECHNICAL SALES MANAGER
(Dallas, TX)**

Facilitate and manage the sales of the Company's products. Responsible for all existing and potential accounts in Texas. Communicate closely with customer contact and coordinate sales strategies within region. Primarily sales related but includes an integral service of functioning as a "technical consultant" in presenting new product ideas to customer's assisting in product evaluations, and implementation and identification of customer process improvements.

Position requires BA degree in Science or chemical-related major, 3+ years on CMP (Chemical Mechanical Planarization) related products and semiconductor process experience, and sales and marketing experience.
